FOREWORD

Informative Publication No. 31/I – Regulations for Safe and Environmentally Sound Recycling of Ships (hereinafter referred to as the Publication) is based on the Annex to the Hong Kong International Convention for the Safe and Environmentally Sound Recycling Of Ships, 2009 (hereinafter referred to as the Hong Kong Convention or the Convention) and contains all the provisions of that Annex.

Additionally, the Publication contains Supplement – Expert Parties Engaged in Visual and/or Sampling Checks for Preparation of Inventory of Hazardous Materials based on IACS Recommendation No.113 (Rev.1 Oct 2012).
1 GENERAL PROVISIONS

1.1 Definitions

For the purposes of this Publication:

1.1.1 Competent person – a person with suitable qualifications, training, and sufficient knowledge, experience and skill, for the performance of the specific work. Specifically, a Competent person may be a trained worker or a managerial employee capable of recognizing and evaluating occupational hazards, risks, and employee exposure to potentially Hazardous Materials or unsafe conditions in a Ship Recycling Facility, and who is capable of specifying the necessary protection and precautions to be taken to eliminate or reduce those hazards, risks, or exposures. The Competent Authority may define appropriate criteria for the designation of such persons and may determine the duties to be assigned to them.

1.1.2 Employer – a natural or legal person that employs one or more workers engaged in Ship Recycling.

1.1.3 Existing ship – a ship which is not a new ship.

1.1.4 New ship – a ship:
   .1 for which the building contract is placed on or after the entry into force of Hong Kong Convention (i.e. International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009); or
   .2 in the absence of a building contract, the keel of which is laid or which is at a similar stage of construction on or after six months after the entry into force of Hong Kong Convention; or
   .3 the delivery of which is on or after 30 months after the entry into force of Hong Kong Convention.

1.1.5 New installation – the installation of systems, equipment, insulation, or other material on a ship after the date on which Hong Kong Convention enters into force.

1.1.6 Safe-for-entry space – a space that meets the following criteria:
   .1 the oxygen content of the atmosphere and the concentration of flammable vapours are within safe limits;
   .2 any toxic materials in the atmosphere are within permissible concentrations; and
   .3 any residues or materials associated with the work authorized by the Competent person will not produce uncontrolled release of toxic materials or an unsafe concentration of flammable vapours under existing atmospheric conditions while maintained as directed.

1.1.7 Safe-for-hot work space – a space that meets the following criteria:
.1 a safe, non-explosive condition, including gas-free status, exists for the use of electric arc or gas welding equipment, cutting or burning equipment or other forms of naked flame, as well as heating, grinding, or spark generating operations;
.2 Safe-for-entry requirements of regulation 1.1.6 are met;
.3 existing atmospheric conditions will not change as a result of the hot work; and
.4 all adjacent spaces have been cleaned, or inerted, or treated sufficiently to prevent the start or spread of fire.

1.1.8 **Shipowner** – the person or persons or company registered as the owner of the ship or, in the absence of registration, the person or persons or company owning the ship or any other organization or person such as the manager, or the bareboat charterer, who has assumed the responsibility for operation of the ship from the owner of the ship. However, in the case of a ship owned by a State and operated by a company which in that State is registered as the ship’s operator, “owner” shall mean such company. This term also includes those who have ownership of the ship for a limited period pending its sale or handing over to a Ship Recycling Facility.

1.1.9 **Site inspection** – an inspection of the Ship Recycling Facility confirming the condition described by the verified documentation.

1.1.10 **Statement of Completion** – a confirmatory statement issued by the Ship Recycling Facility that the Ship Recycling has been completed in accordance with **Hong Kong Convention**.

1.1.11 **Tanker** – an oil tanker as defined in **MARPOL** Annex I or an NLS tanker as defined in **MARPOL** Annex II.

1.1.12 **Worker** – any person who performs work, either regularly or temporarily, in the context of an employment relationship including contractor personnel.

1.2 **General applicability**

Unless expressly provided otherwise, the design, construction, survey, certification, operation and recycling of ships shall be conducted in accordance with the provisions of this **Publication**.

1.3 **Relationship with other standards, recommendations and guidance**

Parties shall take measures to implement the requirements of the regulations of this **Publication**, taking into account relevant and applicable standards, recommendations and guidance developed by the **International Labour Organization** and the relevant and applicable technical standards, recommendations and guidance developed under the **Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal**.
2 REQUIREMENTS FOR SHIPS

Part A – Design, construction, operation and maintenance of ships

2.1 Controls of ships’ Hazardous Materials

In accordance with the requirements specified in Appendix 1 to the *Hong Kong Convention* each Party:

.1 shall prohibit and/or restrict the installation or use of Hazardous Materials listed in Appendix 1 on ships entitled to fly its flag or operating under its authority; and

.2 shall prohibit and/or restrict the installation or use of such materials on ships, whilst in its ports, shipyards, ship repair yards, or offshore terminals, and shall take effective measures to ensure that such ships comply with those requirements.

2.2 Inventory of Hazardous Materials

2.2.1 Each new ship shall have on board an *Inventory of Hazardous Materials*. The *Inventory* shall be verified either by the Administration or by PRS authorized by it taking into account guidelines, including any threshold values and exemptions contained in those guidelines, developed by IMO. The *Inventory of Hazardous Materials* shall be specific to each ship and shall at least:

.1 identify as Part I, Hazardous Materials listed in Appendices 1 and 2 to the *Hong Kong Convention* and contained in ship’s structure or equipment, their location and approximate quantities; and

.2 clarify that the ship complies with regulation 4.

2.2.2 Existing ships shall comply as far as practicable with paragraph 1 not later than 5 years after the entry into force of the *Hong Kong Convention*, or before going for recycling if this is earlier, taking into account the guidelines developed by IMO and the Organization’s Harmonized System of Survey and Certification. The Hazardous Materials listed in Appendix 1, at least, shall be identified when the *Inventory* is developed. For existing ships a plan shall be prepared describing the visual/sampling check by which the *Inventory of Hazardous Materials* is developed, taking into account the guidelines developed by IMO.

2.2.3 Part I of the *Inventory of Hazardous Materials* shall be properly maintained and updated throughout the operational life of the ship, reflecting new installations containing Hazardous Materials listed in Appendix 2 and relevant changes in ship structure and equipment, taking into account the guidelines developed by IMO.

2.2.4 Prior to recycling, the *Inventory* shall, in addition to the properly maintained and updated Part I, incorporate Part II for operationally generated wastes and Part III for stores, and be verified either by the Administration or by PRS authorized by it, taking into account the guidelines developed by IMO.
2.3 Procedure for proposing amendments to Appendices 1 and 2

2.3.1 Any Party may propose an amendment to Appendix 1 and/or Appendix 2 in accordance with this regulation. The proposed amendment shall be considered within IMO under Article 18, paragraph 2 and this regulation.

2.3.2 When IMO receives a proposal, it shall also bring the proposal to the attention of the United Nations and its Specialized Agencies, intergovernmental organizations having agreements with IMO and non-governmental organizations in consultative status with IMO and shall make it available to them.

2.3.3 The Committee shall establish a technical group in accordance with regulation 7 to review proposals submitted in accordance with paragraph 1 of this regulation.

2.3.4 The technical group shall review the proposal along with any additional data, including decisions adopted by other international bodies regarding their lists of materials or hazardous substances, submitted by any interested entity, and shall evaluate and report to the Committee whether the Hazardous Material in question is likely, in the context of the Hong Kong Convention, to lead to significant adverse effects on human health or the environment such that the amendment of Appendix 1 or Appendix 2 is warranted. In this regard:

.1 The technical group’s review shall include:

.1.1 an evaluation of the association between the Hazardous Material in question and the likelihood, in the context of the Hong Kong Convention, that it will lead to significant adverse effects on human health or the environment based on the submitted data or other relevant data brought to the attention of the group;

.1.2 an evaluation of the potential risk reduction attributable to the proposed control measures and any other control measures that may be considered by the technical group;

.1.3 consideration of available information on the technical feasibility of control measures;

.1.4 consideration of available information on other effects arising from the introduction of such control measures relating to:

– the environment;
– human health and safety including that of seafarers and workers; and
– the cost to international shipping and other relevant sectors.

.1.5 consideration of the availability of suitable alternatives to the Hazardous Material to be controlled, including a consideration of the potential risks of alternatives;

.1.6 consideration of the risks posed by the Hazardous Material during the recycling process; and

.1.7 consideration of suitable threshold values and any useful or necessary exemptions.
.2 If the technical group finds that the Hazardous Material in question is likely, in the context of the *Hong Kong Convention*, to lead to significant adverse effects on human health or the environment, lack of full scientific certainty shall not be used as a reason to prevent the group from proceeding with an evaluation of the proposal.

.3 The technical group’s report shall be in writing and shall take into account each of the evaluations and considerations referred to in subparagraph .1, except that the technical group may decide not to proceed with the evaluations and considerations described in subparagraphs .1.2 to .1.7 if it determines after the evaluation in subparagraph .1.1 that the proposal does not warrant further consideration.

.4 The technical group’s report shall include, inter alia, a recommendation on whether international controls pursuant to the *Hong Kong Convention* are warranted on the Hazardous Material in question, on the suitability of the specific control measures suggested in the comprehensive proposal, or on other control measures which it believes to be more suitable.

2.3.5 The Committee shall decide whether to approve any proposal to amend Appendix 1 or Appendix 2, and any modifications thereto, if appropriate, taking into account the technical group’s report. Any proposed amendment shall specify the application of the amendment for ships certified in accordance with the *Hong Kong Convention* before the entry into force of the amendment. If the report finds that the Hazardous Material in question is likely, in the context of the *Hong Kong Convention*, to lead to significant adverse effects on human health or the environment, lack of full scientific certainty shall not be used as a reason to prevent a decision from being taken to list a Hazardous Material in Appendix 1 or Appendix 2. A decision not to approve the proposal shall not preclude future submission of a new proposal with respect to a particular Hazardous Material if new information comes to light.

2.4 Technical Groups

2.4.1 The Committee may establish one or more technical groups pursuant to regulation 6 as needed. The technical group may comprise representatives of the Parties, Members of IMO, the United Nations and its Specialized Agencies, intergovernmental organizations having agreements with IMO, and non-governmental organizations in consultative status with IMO, which should preferentially include representatives of institutions and laboratories with expertise in environmental fate and effects of substances, toxicological effects, marine biology, human health, economic analysis, risk management, shipbuilding, international shipping, occupational health and safety or other fields of expertise necessary to objectively review the technical merits of a proposal.
2.4.2 The Committee shall decide on the terms of reference, organization, participation and operation of the technical groups. Such terms shall provide for protection of any confidential information that may be submitted. Technical groups may hold such meetings as required, but shall endeavour to conduct their work through written or electronic correspondence or other media as appropriate.

2.4.3 Only the representatives of Parties may participate in formulating any recommendation to the Committee pursuant to regulation 6. A technical group shall endeavour to achieve unanimity among the representatives of the Parties. If unanimity is not possible, the technical group shall communicate any minority views of such representatives.

Part B – Preparation for Ship Recycling

2.5 General requirements

Ships destined to be recycled shall:

.1 only be recycled at Ship Recycling Facilities that are:
   .1 authorized in accordance with this Convention; and
   .2 fully authorized to undertake all the ship recycling which the Ship Recycling Plan specifies to be conducted by the identified Ship Recycling Facility(ies);

.2 conduct operations in the period prior to entering the Ship Recycling Facility in order to minimize the amount of cargo residues, remaining fuel oil, and wastes remaining on board;

.3 in the case of a tanker, arrive at the Ship Recycling Facility with cargo tanks and pump room(s) in a condition that is ready for certification as Safe-for-entry, or Safe-for-hot work, or both, according to national laws, regulations and policies of the Party under whose jurisdiction the Ship Recycling Facility operates;

.4 provide to the Ship Recycling Facility all available information relating to the ship for the development of the Ship Recycling Plan required by regulation 9;

.5 complete the Inventory required by regulation 5; and

.6 be certified as ready for recycling by the Administration or organization recognized by it, prior to any recycling activity taking place.

2.6 Ship Recycling Plan

A ship-specific Ship Recycling Plan shall be developed by the Ship Recycling Facility(ies) prior to any recycling of a ship, taking into account the guidelines developed by IMO. The Ship Recycling Plan shall:

.1 be developed taking into account information provided by the shipowner;

.2 be developed in the language accepted by the Party authorizing the Ship Recycling Facility, and if the language used is not English, French or Spanish, the Ship Recycling Plan shall be translated into one of these languages, except where the Administration is satisfied that this is not necessary;
include information concerning inter alia, the establishment, maintenance, and monitoring of Safe-for-entry and Safe-for-hot work conditions and how the type and amount of materials including those identified in the Inventory of Hazardous Materials will be managed;

in accordance with the declaration deposited pursuant to Article 16.6 of the *Hong Kong Convention*, be either explicitly or tacitly approved by the Competent Authority authorizing the Ship Recycling Facility. The Competent Authority shall send written acknowledgement of receipt of the Ship Recycling Plan to the Ship Recycling Facility, Ship Owner and Administration within three (3) working days of its receipt in accordance with regulation 24. Thereafter:

where a Party requires explicit approval of the *Ship Recycling Plan*, the Competent Authority shall send written notification of its decision to approve or deny the *Ship Recycling Plan* to the Ship Recycling Facility, Ship Owner and Administration; and

where a Party requires tacit approval of the *Ship Recycling Plan*, the acknowledgment of receipt shall specify the end date of a 14-day review period. The Competent Authority shall notify any written objection to the *Ship Recycling Plan* to the Ship Recycling Facility, Ship Owner and Administration within this 14-day review period. Where no such written objection has been notified, the *Ship Recycling Plan* shall be deemed to be approved.

once approved in accordance with paragraph .4, shall be made available for inspection by the Administration, or any nominated surveyors or organization recognized by it; and

where more than one Ship Recycling Facility is used, identify the Ship Recycling Facilities to be used and specify the recycling activities and the order in which they occur at each authorized Ship Recycling Facility.

Part C – Surveys and certification

2.7 Surveys

Ships to which the *Hong Kong Convention* applies shall be subject to the surveys specified below:

an initial survey before the ship is put in service, or before the *International Certificate on Inventory of Hazardous Materials* is issued. This survey shall verify that Part I of the *Inventory* required by regulation 5 is in accordance with the requirements of the *Hong Kong Convention*;

a renewal survey at intervals specified by the Administration, but not exceeding five years. This survey shall verify that Part I of the *Inventory of Hazardous Materials* required by regulation 5 complies with the requirements of the *Hong Kong Convention*;
an additional survey, either general or partial, according to the circumstances, may be made at the request of the shipowner after a change, replacement, or significant repair of the structure, equipment, systems, fittings, arrangements and material. The survey shall be such as to ensure that any such change, replacement, or significant repair has been made in the way that the ship continues to comply with the requirements of the Hong Kong Convention, and that Part I of the Inventory is amended as necessary; and

a final survey prior to the ship being taken out of service and before the recycling of the ship has started. This survey shall verify:

1. that the Inventory of Hazardous Materials as required by regulation 5.4 is in accordance with the requirements of the Hong Kong Convention taking into account the guidelines developed by IMO;

2. that the Ship Recycling Plan, as required by regulation 9, properly reflects the information contained in the Inventory of Hazardous Materials as required by regulation 5.4 and contains information concerning the establishment, maintenance and monitoring of Safe-for-entry and Safe-for-hot work conditions; and

3. that the Ship Recycling Facility(ies) where the ship is to be recycled holds a valid authorization in accordance with the Hong Kong Convention.

2.7.2 Surveys of ships for the purpose of enforcement of the provisions of the Hong Kong Convention shall be carried out by officers of the Administration, taking into account the guidelines developed by IMO. The Administration may, however, entrust the surveys either to surveyors nominated for the purpose or to PRS recognized by it.

2.7.3 An Administration nominating surveyors or recognizing organizations to conduct surveys, as described in paragraph 2 shall, as a minimum, empower such nominated surveyors or recognized organizations to:

1. require a ship that they survey to comply with the provisions of the Hong Kong Convention; and

2. carry out surveys and inspections if requested by the appropriate authorities of a port State that is a Party.

2.7.4 In every case, the Administration concerned shall be responsible to ensure the completeness and efficiency of the survey and shall undertake to ensure the necessary arrangements to satisfy this obligation.

2.7.5 The initial and renewal surveys should be harmonized with the surveys required by other applicable statutory instruments of IMO.

2.8 Issuance and endorsement of certificates

2.8.1 An International Certificate on Inventory of Hazardous Materials shall be issued either by the Administration or by PRS authorized by it after successful completion of an initial or renewal survey conducted in accordance with regulation 10, to
any ships to which regulation 10 applies, except for existing ships for which both an initial survey and a final survey are conducted at the same time, taking into account the guidelines developed by IMO.

2.8.2 The *International Certificate on Inventory of Hazardous Materials* issued under paragraph 1, at the request of the shipowner, shall be endorsed either by the Administration or by PRS authorized by it after successful completion of an additional survey conducted in accordance with regulation 10.

2.8.3 Notwithstanding regulation 14.2 and the requirements of regulation 10.1.2, when the renewal survey is completed within three months before the expiry date of the existing certificate, the new certificate shall be valid from the date of completion of the renewal survey to a date not exceeding five years from the date of expiry of the existing certificate.

2.8.4 When the renewal survey is completed after the expiry date of the existing certificate, the new certificate shall be valid from the date of completion of the renewal survey to a date not exceeding five years from the date of expiry of the existing certificate.

2.8.5 When the renewal survey is completed more than three months before the expiry date of the existing certificate, the new certificate shall be valid from the date of completion of the renewal survey to a date not exceeding five years from the date of completion of the renewal survey.

2.8.6 If a certificate is issued for a period of less than five years, the Administration may extend the validity of the certificate beyond the expiry date to the maximum period specified in regulation 10.1.2.

2.8.7 If a renewal survey has been completed and a new certificate cannot be issued or placed on board the ship before the expiry date of the existing certificate, PRS authorized by the Administration may endorse the existing certificate and such a certificate shall be accepted as valid for a further period which shall not exceed five months from the expiry date.

2.8.8 If a ship at the time when a certificate expires is not in a port in which it is to be surveyed, the Administration may extend the period of validity of the certificate but this extension shall be granted only for the purpose of allowing the ship to complete its voyage to the port in which it is to be surveyed and then only in cases where it appears proper and reasonable to do so. No certificate shall be extended for a period longer than three months, and a ship to which an extension is granted shall not, on its arrival in the port in which it is to be surveyed, be entitled by virtue of such extension to leave that port without having a new certificate. When the renewal survey is completed, the new certificate shall be valid to a date not exceeding five years from the date of expiry of the existing certificate before the extension was granted.
2.8.9  A certificate issued to a ship engaged on short voyages which has not been extended under the foregoing provisions of this regulation may be extended by the Administration for a period of grace of up to one month from the date of expiry stated on it. When the renewal survey is completed, the new certificate shall be valid to a date not exceeding five years from the date of expiry of the existing certificate before the extension was granted.

2.8.10  In special circumstances, as determined by the Administration, a new certificate need not be dated from the date of expiry of the existing certificate as required by paragraph 4, 8 or 9 of this regulation. In these special circumstances, the new certificate shall be valid to a date not exceeding five years from the date of completion of the renewal survey.

2.8.11  An *International Ready for Recycling Certificate* shall be issued either by the Administration or by PRS authorized by it, after successful completion of a final survey in accordance with the provisions of regulation 10, to any ships to which regulation 10 applies, taking into account the authorization of the Ship Recycling Facility and the guidelines developed by IMO.

2.8.12  A certificate issued under the authority of a Party shall be accepted by the other Parties and regarded for all purposes covered by the *Hong Kong Convention* as having the same validity as a certificate issued by them. Certificates shall be issued or endorsed either by the Administration or by PRS duly authorized by it. In every case, the Administration assumes full responsibility for the certificate.

2.9  Issuance or endorsement of a certificate by another Party

2.9.1  At the request of the Administration, another Party may cause a ship to be surveyed and, if satisfied that the provisions of the *Hong Kong Convention* are complied with, shall issue or authorize the issuance of a certificate to the ship, and where appropriate, endorse or authorize the endorsement of that certificate on the ship, in accordance with this *Publication*.

2.9.2  A copy of the certificate and a copy of the survey report shall be transmitted as soon as possible to the requesting Administration.

2.9.3  A certificate so issued shall contain a statement to the effect that it has been issued at the request of the Administration and it shall have the same force and receive the same recognition as a certificate issued by the Administration.

2.9.4  No certificate shall be issued to a ship entitled to fly the flag of a State which is not a Party.
2.10 Form of the certificates

The certificates shall be drawn up in an official language of the issuing Party, in the form set forth in Appendices 3 and 4. If the language used is not English, French or Spanish, the text shall include a translation into one of these languages. The Administration may, however, issue the International Certificate on Inventory of Hazardous Materials drawn up only in an official language of the issuing Party to ships not engaged in voyages to ports or offshore terminals under the jurisdiction of other Parties to the Hong Kong Convention and the International Ready for Recycling Certificate drawn up only in an official language of the issuing Party to ships recycled in Ship Recycling Facilities under the jurisdiction of the issuing Party.

2.11 Duration and validity of the certificates

2.11.1 An International Certificate on Inventory of Hazardous Materials issued under regulation 11 or 12 shall cease to be valid in any of the following cases:

1. if the condition of the ship does not correspond substantially with the particulars of the certificate, including where Part I of the Inventory of Hazardous Materials is not properly maintained and updated, reflecting changes in ship structure and equipment, in accordance with the guidelines developed by IMO;

2. upon transfer of the ship to the flag of another State. A new certificate shall only be issued when the Party issuing the new certificate is fully satisfied that the ship is in compliance with the requirements of regulation 10. In the case of a transfer between Parties, if requested within three months after the transfer has taken place, the Party whose flag the ship was formerly entitled to fly shall, as soon as possible, transmit to the Administration copies of the certificates carried by the ship before the transfer and, if available, copies of the relevant survey reports;

3. if the renewal survey is not completed within the periods specified under regulations 10.1 and 11; or

4. if the certificate is not endorsed in accordance with regulation 11 or 12.

2.11.2 An International Certificate on Inventory of Hazardous Materials shall be issued for a period specified by the Administration, which shall not exceed five years.

2.11.3 An International Ready for Recycling Certificate shall be issued for a period specified by the Administration that shall not exceed three months.

2.11.4 An International Ready for Recycling Certificate issued under regulation 11 or 12 shall cease to be valid if the condition of the ship does not correspond substantially with the particulars of the certificate.

2.11.5 The International Ready for Recycling Certificate may be extended by the Administration or by any person or organization authorized by it for a single point to point voyage to the Ship Recycling Facility.
3 REQUIREMENTS FOR SHIP RECYCLING FACILITIES

3.1 Controls on Ship Recycling Facilities

3.1.1 Each Party shall establish legislation, regulations, and standards that are necessary to ensure that Ship Recycling Facilities are designed, constructed, and operated in a safe and environmentally sound manner in accordance with the regulations of the Hong Kong Convention.

3.1.2 Each Party shall establish a mechanism for authorizing Ship Recycling Facilities with appropriate conditions to ensure that such Ship Recycling Facilities meet the requirements of the Hong Kong Convention.

3.1.3 Each Party shall establish a mechanism for ensuring that Ship Recycling Facilities comply with the requirements of this chapter including the establishment and effective use of inspection, monitoring and enforcement provisions, including powers of entry and sampling. Such a mechanism may include an audit scheme to be carried out by the Competent Authority(ies) or by PRS recognized by the Party, taking into account guidelines developed by IMO, and the results of these audits should be communicated to IMO.

3.1.4 Each Party shall designate one or more Competent Authorities and the single contact point to be used by the Organization, Parties to the Hong Kong Convention and other interested entities, for matters related to Ship Recycling Facilities operating within the jurisdiction of that Party.

3.2 Authorization of Ship Recycling Facilities

3.2.1 Ship Recycling Facilities which recycle ships to which the Hong Kong Convention applies, or ships treated similarly pursuant to Article 3.4, shall be authorized by a Party taking into account the guidelines developed by IMO.

3.2.2 The authorization shall be carried out by the Competent Authority(ies) and shall include verification of documentation required by the Hong Kong Convention and a site inspection. The Competent Authority(ies) may however entrust the authorization of Ship Recycling Facilities to PRS recognized by it.

3.2.3 The Party shall notify IMO of the specific responsibilities and conditions of the authority delegated to PRS recognized by it, for circulation to Parties. In every case, the Competent Authority(ies) retains full responsibility for the authorization issued.

3.2.4 The authorization shall be drawn up in the form set forth in Appendix 5. If the language used is not English, French or Spanish, the text shall include a translation into one of these languages.
3.2.5 The authorization shall be valid for a period specified by the Party but not exceeding five years. The Party shall identify the terms for which the authorization will be issued, withdrawn, suspended, amended and renewed, and communicate these terms to the Ship Recycling Facilities. If a Ship Recycling Facility refuses inspection by the Competent Authority(ies) or by PRS recognized by it/them and operating on its/their behalf, the authorization shall be suspended or withdrawn.

3.2.6 If incidents or actions taken at the Ship Recycling Facility have the effect that the conditions for the authorization are no longer fulfilled, the Ship Recycling Facility shall inform the Competent Authority(ies) thereon. The Competent Authority(ies) may accordingly decide to suspend or withdraw the authorization, or require corrective actions by the Ship Recycling Facility.

3.3 General requirements

3.3.1 Ship Recycling Facilities authorized by a Party shall establish management systems, procedures and techniques which do not pose health risks to the workers concerned or to the population in the vicinity of the Ship Recycling Facility and which will prevent, reduce, minimize and to the extent practicable eliminate adverse effects on the environment caused by Ship Recycling, taking into account guidelines developed by IMO.

3.3.2 Ship Recycling Facilities authorized by a Party shall, for ships to which the Hong Kong Convention applies, or ships treated similarly pursuant to Article 3.4:
   .1 only accept ships that:
      .1 comply with the Hong Kong Convention; or
      .2 meet the requirements of the Hong Kong Convention;
   .2 only accept ships which they are authorized to recycle; and
   .3 have the documentation of its authorization available if such documentation is requested by a shipowner that is considering recycling a ship at that Ship Recycling Facility.

3.4 Ship Recycling Facility Plan

Ship Recycling Facilities authorized by a Party shall prepare a Ship Recycling Facility Plan. The Plan shall be adopted by the board or the appropriate governing body of the Recycling Company, and shall include:
   .1 a policy ensuring workers’ safety and the protection of human health and the environment, including the establishment of objectives that lead to the minimization and elimination to the extent practicable of the adverse effects on human health and the environment caused by Ship Recycling;
   .2 a system for ensuring implementation of the requirements set out in the Hong Kong Convention, the achievement of the goals set out in the policy of the Recycling Company, and the continuous improvement of the procedures and standards used in the Ship Recycling operations;
identification of roles and responsibilities for employers and workers when conducting Ship Recycling operations;

a programme for providing appropriate information and training of workers for the safe and environmentally sound operation of the Ship Recycling Facility;

an emergency preparedness and response plan;

a system for monitoring the performance of Ship Recycling;

a record-keeping system showing how Ship Recycling is carried out;

a system for reporting discharges, emissions, incidents and accidents causing damage, or with the potential of causing damage, to workers’ safety, human health and the environment; and

a system for reporting occupational diseases, accidents, injuries and other adverse effects on workers’ safety and human health, taking into account guidelines developed by IMO.

3.5 Prevention of adverse effects to human health and the environment

Ship Recycling Facilities authorized by a Party shall establish and utilize procedures to:

- prevent explosions, fires, and other unsafe conditions by ensuring that Safe-for-hot work conditions and procedures are established, maintained and monitored throughout Ship Recycling;

- prevent harm from dangerous atmospheres and other unsafe conditions by ensuring that Safe-for-entry conditions and procedures are established, maintained, and monitored in ship spaces, including confined spaces and enclosed spaces, throughout Ship Recycling;

- prevent other accidents, occupational diseases and injuries or other adverse effects on human health and the environment; and

- prevent spills or emissions throughout Ship Recycling which may cause harm to human health and/or the environment, taking into account guidelines developed by IMO.

3.6 Safe and environmentally sound management of Hazardous Materials

3.6.1 Ship Recycling Facilities authorized by a Party shall ensure safe and environmentally sound removal of any Hazardous Material contained in a ship certified in accordance with regulation 11 or 12. The person(s) in charge of the recycling operations and the workers shall be familiar with the requirements of the Hong Kong Convention relevant to their tasks and, in particular, actively use the Inventory of Hazardous Materials and the Ship Recycling Plan, prior to and during the removal of Hazardous Materials.

3.6.2 Ship Recycling Facilities authorized by a Party shall ensure that all Hazardous Materials detailed in the Inventory are identified, labelled, packaged and removed to the maximum extent possible prior to cutting by properly trained and equipped workers, taking into account the guidelines developed by IMO, in particular:
.1 hazardous liquids, residues and sediments;
.2 substances or objects containing heavy metals such as lead, mercury, cadmium and hexavalent chromium;
.3 paints and coatings that are highly flammable and/or lead to toxic releases;
.4 asbestos and materials containing asbestos;
.5 PCB and materials containing PCBs, ensuring that heat inducing equipment is avoided during such operations;
.6 CFCs and halons; and
.7 other Hazardous Materials not listed above and that are not a part of the ship structure.

3.6.3 Ship Recycling Facilities authorized by a Party shall provide for and ensure safe and environmentally sound management of all Hazardous Materials and wastes removed from the ship recycled at that Ship Recycling Facility. Waste management and disposal sites shall be identified to provide for the further safe and environmentally sound management of materials.

3.6.4 All wastes generated from the recycling activity shall be kept separate from recyclable materials and equipment, labelled, stored in appropriate conditions that do not pose a risk to the workers, human health or the environment and only transferred to a waste management facility authorized to deal with their treatment and disposal in a safe and environmentally sound manner.

3.7 Emergency preparedness and response

Ship Recycling Facilities authorized by a Party shall establish and maintain an emergency preparedness and response plan. The plan shall be made having regard to the location and environment of the Ship Recycling Facility, and shall take into account the size and nature of activities associated with each Ship Recycling operation. The plan shall furthermore:

.1 ensure that the necessary equipment and procedures to be followed in the case of an emergency are in place, and that drills are conducted on a regular basis;
.2 ensure that the necessary information, internal communication and coordination are provided to protect all people and the environment in the event of an emergency at the Ship Recycling Facility;
.3 provide for communication with, and information to, the relevant Competent Authority(ies), the neighbourhood and emergency response services;
.4 provide for first-aid and medical assistance, fire-fighting and evacuation of all people at the Ship Recycling Facility, pollution prevention; and
.5 provide for relevant information and training to all workers of the Ship Recycling Facility, at all levels and according to their competence, including regular exercises in emergency prevention, preparedness and response procedures.
3.8 Worker safety and training

3.8.1 Ship Recycling Facilities authorized by a Party shall provide for worker safety by measures including:
   .1 ensuring the availability, maintenance and use of personal protective equipment and clothing needed for all Ship Recycling operations;
   .2 ensuring that training programmes are provided to enable workers to safely undertake all Ship Recycling operations they are tasked to do; and
   .3 ensuring that all workers at the Ship Recycling Facility have been provided with appropriate training and familiarization prior to performing any Ship Recycling operation.

3.8.2 Ship Recycling Facilities authorized by a Party shall provide and ensure the use of personal protective equipment for operations requiring such use, including:
   .1 head protection;
   .2 face and eye protection;
   .3 hand and foot protection;
   .4 respiratory protective equipment;
   .5 hearing protection;
   .6 protectors against radioactive contamination;
   .7 protection from falls; and
   .8 appropriate clothing.

3.8.3 Ship Recycling Facilities authorized by a Party may co-operate in providing for training of workers. Taking into account the guidelines developed by IMO, the training programmes set forth in paragraph 1.2 of this regulation shall:
   .1 cover all workers including contractor personnel and employees in the Ship Recycling Facility;
   .2 be conducted by Competent persons;
   .3 provide for initial and refresher training at appropriate intervals;
   .4 include participants’ evaluation of their comprehension and retention of the training;
   .5 be reviewed periodically and modified as necessary; and
   .6 be documented.

3.9 Reporting on incidents, accidents, occupational diseases and chronic effects

3.9.1 Ship Recycling Facilities authorized by a Party shall report to the Competent Authority(ies) any incident, accident, occupational diseases, or chronic effects causing, or with the potential of causing, risks to workers safety, human health and the environment.

3.9.2 Reports shall contain a description of the incident, accident, occupational disease, or chronic effect, its cause, the response action taken and the consequences and corrective actions to be taken.
4 REPORTING REQUIREMENTS

4.1 Initial notification and reporting requirements

4.1.1 A shipowner shall notify the Administration in due time and in writing of the intention to recycle a ship in order to enable the Administration to prepare for the survey and certification required by the Hong Kong Convention.

4.1.2 A Ship Recycling Facility when preparing to receive a ship for recycling shall notify in due time and in writing its Competent Authority(ies) of the intent. The notification shall include at least the following ship details:

1. name of the State whose flag the ship is entitled to fly;
2. date on which the ship was registered with that State;
3. ship’s identification number (IMO number);
4. hull number on new-building delivery;
5. name and type of the ship;
6. port at which the ship is registered;
7. name and address of the Shipowner as well as the IMO registered owner identification number;
8. name and address of the company as well as the IMO company identification number;
9. name of all classification society(ies) with which the ship is classed;
10. ship’s main particulars (Length overall (LOA), Breadth (Moulded), Depth (Moulded), Lightweight, Gross and Net tonnage, and engine type and rating);
11. Inventory of Hazardous Materials; and
12. draft ship recycling plan for approval pursuant to regulation 9.

When the ship destined to be recycled has acquired the International Ready for Recycling Certificate, the Ship Recycling Facility shall report to its Competent Authority(ies) the planned start of the Ship Recycling. The report shall be in accordance with the reporting format in Appendix 6, and shall at least include a copy of the International Ready for Recycling Certificate. Recycling of the ship shall not start prior to the submission of the report.

4.2 Reporting upon completion

When the partial or complete recycling of a ship is completed in accordance with the requirements of the Hong Kong Convention, a Statement of Completion shall be issued by the Ship Recycling Facility and reported to its Competent Authority(ies). This report must be compiled as shown in appendix 7. The Competent Authority(ies) shall send a copy of the Statement to the Administration which issued the International Ready for Recycling Certificate for the ship. The Statement shall be issued within 14 days of the date of partial or completed Ship Recycling in accordance with the Ship Recycling Plan and shall include a report on incidents and accidents damaging human health and/or the environment, if any.
## APPENDIX 1

### CONTROLS OF HAZARDOUS MATERIALS

<table>
<thead>
<tr>
<th>Hazardous Material</th>
<th>Definitions</th>
<th>Control measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Asbestos</td>
<td>Materials containing asbestos</td>
<td>For all ships, new installation of materials which contain asbestos shall be prohibited.</td>
</tr>
<tr>
<td>Ozone-depleting substances</td>
<td>Ozone-depleting substances mean controlled substances defined in paragraph 4 of article 1 of the <em>Montreal Protocol on Substances that Deplete the Ozone Layer, 1987</em>, listed in Annexes A, B, C or E to the said <em>Protocol</em> in force at the time of application or interpretation of this Annex. Ozone-depleting substances that may be found on board ship include, but are not limited to: Halon 1211 Bromochlorodifluoromethane Halon 1301 Bromotrifluoromethane Halon 2402 1,2-Dibromo-1,1,2,2-tetrafluoroethane (also known as Halon 114B2) CFC-11 Trichlorofluoromethane CFC-12 Dichlorodifluoromethane CFC-113 1,1,2-Trichloro-1,2,2-trifluoroethane CFC-114 1,2-Dichloro-1,1,2,2-tetrafluoroethane CFC-115 Chloropentafluoroethane</td>
<td>New installations which contain ozone-depleting substances shall be prohibited on all ships, except that new installations containing hydrochlorofluorocarbons (HCFCs) are permitted until 1 January 2020.</td>
</tr>
<tr>
<td>Polychlorinated biphenyls (PCB)</td>
<td>Polychlorinated biphenyls mean aromatic compounds formed in such a manner that the hydrogen atoms on the biphenyl molecule (two benzene rings bonded together by a single carbon-carbon bond) may be replaced by up to ten chlorine atoms</td>
<td>For all ships, new installation of materials which contain Polychlorinated biphenyls shall be prohibited.</td>
</tr>
<tr>
<td>Anti-fouling compounds and systems</td>
<td>Anti-fouling compounds and systems regulated under Annex I to the <em>International Convention on the Control of Harmful Anti-fouling Systems on Ships, 2001 (AFS Convention)</em> in force at the time of application or interpretation of this Annex.</td>
<td>1. No ship may apply antifouling systems containing organotin compounds as a biocide or any other antifouling system whose application or use is prohibited by the <em>AFS Convention</em>. 2. No new ships or new installations on ships shall apply or employ antifouling compounds or systems in a manner inconsistent with the <em>AFS Convention</em>.</td>

**Particulars of Part I of the Inventory of Hazardous Materials**

Part I of the Inventory of Hazardous Materials identification/verification number:…

Note: Part I of the Inventory of Hazardous Materials, as required by regulation 5 of the Annex to the Convention, is an essential part of the International Certificate on Inventory of Hazardous Materials and must always accompany the International Certificate on Inventory of Hazardous Materials. Part I of the Inventory of Hazardous Materials should be compiled on the basis of the standard format shown in the guidelines developed by the Organization.

THIS IS TO CERTIFY:

1. that the ship has been surveyed in accordance with regulation 10 of the Annex to the Convention; and
2. that the survey shows that Part I of the Inventory of Hazardous Materials fully complies with the applicable requirements of the Convention.

Completion date of survey on which this certificate is based: ............(dd/mm/yyyy)

This certificate is valid until ...........................................................(dd/mm/yyyy)

Issued at ...........................................................................................................(dd/mm/yyyy)

(Place of issue of certificate)

(Date of issue) (Signature of duly authorized official issuing the certificate)

(Seal or stamp of the authority, as appropriate)
ENDORSEMENT TO EXTEND THE CERTIFICATE IF VALID FOR LESS THAN FIVE YEARS WHERE REGULATION 11.6 APPLIES*

The ship complies with the relevant provisions of the Convention, and this certificate shall, in accordance with regulation 11.6 of the Annex to the Convention, be accepted as valid until
(dd/mm/yyyy): ............................................

Signed: ........................................................
   (Signature of duly authorized official)

Place: ........................................................

Date: (dd/mm/yyyy) ....................................

   (Seal or stamp of the authority, as appropriate)

ENDORSEMENT WHERE THE RENEWAL SURVEY HAS BEEN COMPLETED AND REGULATION 11.7 APPLIES*

The ship complies with the relevant provisions of the Convention, and this certificate shall, in accordance with regulation 11.7 of the Annex to the Convention, be accepted as valid until
(dd/mm/yyyy): ............................................

Signed: ........................................................
   (Signature of duly authorized official)

Place: ........................................................

Date: (dd/mm/yyyy) ....................................

   (Seal or stamp of the authority, as appropriate)

* This page of the endorsement at survey shall be reproduced and added to the certificate as considered necessary by the Administration.
ENDORSEMENT TO EXTEND THE VALIDITY
OF THE CERTIFICATE UNTIL REACHING THE PORT OF SURVEY
OR FOR A PERIOD OF GRACE WHERE REGULATION 11.8 OR 11.9
APPLIES*

This certificate shall, in accordance with regulation 11.8 or 11.9** of the Annex to the Convention, be accepted as valid until
(dd/mm/yyyy): ........................................................................................................................................

Signed: ........................................................................................................................................
(Signature of duly authorized official)

Place: ........................................................................................................................................

Date: (dd/mm/yyyy) ........................................

(Seal or stamp of the authority, as appropriate)

ENDORSEMENT FOR ADDITIONAL SURVEY*

At an additional survey in accordance with regulation 10 of the Annex to the Convention, the ship was found to comply with the relevant provisions of the Convention.

Signed: ........................................................
(Signature of duly authorized official)

Place: ............................................................

Date: (dd/mm/yyyy) ....................................

(Seal or stamp of the authority, as appropriate)

* This page of the endorsement at survey shall be reproduced and added to the certificate as considered necessary by the Administration.

SUPPLEMENT TO:

Document of Authorization to undertake Ship Recycling (DASR) in accordance with the International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009

Notes:
1. This record shall be permanently attached to the DASR. The DASR shall be available at the Ship Recycling Facility at all times.
2. All procedures, plans and other documents produced by the Ship Recycling Facility and required under the terms to which the DASR has been issued shall be available in the working language of the Ship Recycling Facility and in either English, French or Spanish.
3. The authorization is subject to the limitations defined by this supplement.

1 GENERAL TERMS

1.1 Requirements of the Convention

The Ship Recycling Facility meets the requirements that it be designed, constructed, and operated in a safe and environmentally sound manner in accordance with the Convention, including meeting the relevant requirements of:

Regulation 16 – Authorization of Ship Recycling Facilities
Regulation 17 – General requirements
Regulation 18 – Ship Recycling Facility Plan
Regulation 19 – Prevention of adverse effects to human health and the environment
Regulation 20 – Safe and environmentally sound management of Hazardous Materials
Regulation 21 – Emergency preparedness and response
Regulation 22 – Worker safety and training
Regulation 23 – Reporting on incidents, accidents, occupational diseases and chronic effects
Regulation 24 – Initial notification and reporting requirements
Regulation 25 – Reporting upon completion

These requirements are imposed on the Ship Recycling Facility by way of

(Identify the permit, licence, authorization, legal standards, or other mechanism that applies)

Ship Recycling Facility Plan identification/verification number:

........................................
1.2 Acceptance of ships

For ships to which the Convention applies and ships treated similarly pursuant to Article 3.4 of the Convention, the Ship Recycling Facility can only accept a ship for recycling in accordance with regulation 17 of the Annex to the Convention.

1.3 Safe-for-hot-work and Safe-for-entry conditions

The Ship Recycling Facility is capable of establishing, maintaining and monitoring Safe-for-hot work and Safe-for-entry conditions throughout the Ship Recycling process.

1.4 Management of Hazardous Materials

The Ship Recycling Facility is designed, constructed, operated, and required to ensure that all Hazardous Materials’ management shall be safe and environmentally sound in compliance with the Convention and with all relevant local or national regulations/requirements.

1.5 Map and location of Ship Recycling operations

A map of the boundary of the Ship Recycling Facility and the location of Ship Recycling operations within it, is attached.

2 CAPABILITY OF SHIP RECYCLING FACILITY

2.1 Size of ships

The Ship Recycling Facility is authorized to accept a ship for recycling subject to the following size limitations:

<table>
<thead>
<tr>
<th>Maximum Size</th>
<th>Other Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Length</td>
<td></td>
</tr>
<tr>

Notes:

- **1** Process means the processing of Hazardous Materials in the Ship Recycling Facility, such as:
  a. incineration of Hazardous Materials;
  b. reclamation of Hazardous Materials; and
  c. treatment of oily residues.

- **2** If Yes (Y), indicate in the Ship Recycling Facility Plan the responsible personnel authorized to carry out the removal, with the certificate number or other relevant information.

- **3** If No (N), describe in the Ship Recycling Plan where the Hazardous Materials are to be processed/disposed.

- **4** These Hazardous Materials are specified in Appendices 1 and 2 and regulation 20 of the Convention.

THIS CONFIRMS THAT:

The ship has been recycled in accordance with the Ship Recycling Plan as part of the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009 (hereinafter referred to as “the Convention”) at

(Name and location of the authorized Ship Recycling Facility)

and the recycling of the ship as required by the Convention was completed on:

(dd/mm/yyyy) ..................................................................................................................

(Date of completion)

Issued at ..........................................................................................................................

(Place of issue of the Statement of Completion)

(dd/mm/yyyy) .......................................................... ..................................................

(Date of issue) (Signature of the owner of the Ship Recycling Facility
or a representative acting on behalf of the owner)
1 Introduction

This recommendation gives guidelines intended for ship owners regarding the use of expert parties for onboard visual and/or sampling checks, including the use of services from laboratories carrying out testing of samples.

2 Expert parties engaged in visual and/or sampling checks

2.1 General

The following guidance may be used by ship owners when selecting expert parties engaged in visual and/or sampling checks for hazardous materials onboard existing ships as specified in 2011 Guidelines for the development of the Inventory of Hazardous Materials, as amended and Appendix 1 and 2 of the Annex to the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009, and which can advise on quantities and locations of samples, taking of samples in a safe manner as well as prepare reports on the quantities, locations and estimates of these onboard materials.

Visual and/or sampling checks shall be executed by persons with professional knowledge of hazardous materials licensed as required and, who are trained and equipped experts, in particular with regards to the evaluation and sampling of hazardous materials and materials containing hazardous materials as:

Appendix 1
- Asbestos;
- PCB;
- Ozone depleting substances; and
- Anti-fouling systems containing organotin compounds as a biocide.

Appendix 2
- Cadmium and Cadmium Compounds;
- Hexavalent Chromium and Hexavalent Chromium Compounds;
- Lead and Lead Compounds;
- Mercury and Mercury Compounds;
- Polybrominated Biphenyl (PBBs);
- Polybrominated Diphenyl Ethers (PBDEs);
- Polychlorinated Naphthalenes (more than 3 chlorine atoms);
- Radioactive Substances;
- Certain Shortchain Chlorinated Paraffins (Alkanes, C10-C13, chloro).
Expert parties should have documented quality systems covering all relevant activities. An accredited quality system that complies with the current version of the ISO 9000 series would be acceptable.

2.2 Expert parties engaged in visual and/or sampling checks

Expert parties carrying out sampling checks shall use appropriate laboratories engaged in the testing of samples which should be accredited or certified according to recognized standards.

Specific equipment used on-board the ship for the purpose of sampling checks should be duly calibrated and/or certified according to recognized standards.

Expert parties carrying out visual and/or sampling checks of relevant hazardous materials shall have professional knowledge of ship structures, equipment, hazardous materials and materials used for ship structures and equipment, taking of samples handling of such materials.

2.3 Work shall be executed in accordance with documented work and safety procedures that contain at least the following:
- information on survey preparation;
- safety procedures relevant to the hazards;
- selection and identification of visual and/or sampling check locations;
- material preparation;
- sample removal;
- reinstatement of safe conditions for the material once the sample is taken;
- sample storage, identification and transport requirements; and
- report preparation and content.

Reports shall be based on the 2011 IMO Guidelines for the Development of the Inventory of Hazardous Materials, as amended.

2.4 Expert parties engaged in visual and/or sampling checks shall document each job by including the signatures of operator's designated responsible person in the final report for verification purposes.

2.5 Such expert parties shall provide evidence of all the necessary training, qualifications, licenses or equivalent thereto and the work and safety procedures for visual and/or sampling checks and the handling of specified hazardous material(s), in accordance with recognized national or international standards or the equivalent thereto, and other associated work practices as applicable.
